CHOOSE TO REUSE
If you've been using disposable dinnerware and drinkware in your business for the past year, it's time to make the switch back to reusable.

That's because materials like glass, porcelain and stainless steel have been found to be safe, elegant, sustainable and cost-effective alternatives to disposable plastic and Styrofoam™. You can feel secure knowing that reusables are good for the environment, good for your guests and good for your bottom line.

SO GO AHEAD, DITCH THE DISPOSABLES.
Get the facts on why reusables are the right choice for your business.
UNLIKELY TO TRANSMIT COVID-19

The CDC has determined that COVID-19 is unlikely to be transmitted through surfaces like reusable glassware and dinnerware and has not found disposables to be safer than reusables.

LEARN MORE

NO LESS SAFE THAN DISPOSABLES

Along with the FDA and National Restaurant Association, the CDC recommends restaurants instead focus their efforts on social distancing, masking and regular disinfection to stop the spread of COVID-19.

LEARN MORE

SANITIZED IN DISHWASHER

Your commercial dishwasher already meets local FDA and CDC requirements for ware washing and disinfection. With a dishwasher, you also have complete knowledge of where your tableware has been, unlike with disposables.

A FULL-SERVICE EXPERIENCE

You know your guests are ready to dine in again. No matter the cuisine, reusable glassware and dinnerware give every diner the full-service experiences they crave.

READY FOR SOCIAL MEDIA

The better looking your food, the higher the price it commands. Choose beautiful, durable tableware for eye-catching (and Instagram-worthy) presentations.
LESS WASTEFUL THAN DISPOSABLES
It’s no secret that reusables generate less waste. Every reusable glass, plate or fork you buy keeps dozens of pieces of plastic and Styrofoam™ out of landfills and waterways.

NOT DESTINED FOR THE LANDFILL
Your recyclables and compostables may still end up in a landfill. According to the EPA, of the 267.8 million tons of solid waste Americans generated in 2017, only 94.2 million tons were recycled or composted.

A COST-FRIENDLY OPTION
While the low upfront cost for disposables may be attractive, using sanitized, reusable tableware can actually save a restaurant on average $3,000-$7,000 annually.

PART OF A SUSTAINABLE FUTURE
According to a 2015 Nielsen survey, 66 percent of consumers said they were willing to pay more for sustainable products, giving you the ability to charge premium prices.

A WAY TO SAVE ON TRASH PICKUP
Relying on reusables can also translate to significant savings on trash bags and waste removal services, while a dishwasher is largely a one-time investment.
Setting the standard in glass tableware expertise and innovation since 1818, including its newest premium collection, Master’s Reserve®.

Diverse collections of attractive dinnerware, flatware and holloware for casual environments, including value-driven Brandware™ and Libbey’s finest flatware, Master’s Gauge™.
